

ENOIA

Biographie

ENOIA est la réunion de 3 musiciens : DA SAZ est aux commandes d'un système de synthétiseur modulaire complexe et est responsable du mixage final et du mastering. GOODBYE IVAN joue de la guitare avec un archet et des effets électroniques lorsqu'il ne bidouille pas son échantillonneur tactile. POL est aux commandes du SH-101, d'étranges séquences de sons et d'encore plus d'électronique.

ENOIA dépeint un paysage sonore magnifique et très atmosphérique qui provoque une transe instantanée chez le public. Le contraste entre les lentes progressions d'accords éthérés de type violon de GOODBYE IVAN flottant au-dessus des motifs terrestres complexes et imprévisibles de DA SAZ est subtilement renforcé par les séquences mélodiques sonores de l'espace extra-atmosphérique conçues par POL.

Leur premier album a été réalisé dans un chalet suisse des Alpes en 2016.

Leur deuxième album a été réalisé dans une ferme des Pyrénées en 2018.

Leur troisième album a été réalisé dans une ancienne maison du Salève en 2020.

Leur quatrième album sera produit au studio Willem Twee aux Pays-Bas en 2023.

ENOIA

Biography

ENOIA is the reunion of 3 musicians : DA SAZ (Delhi) is at the command of a complex modular synthesizer system and is responsible for the final mix and the mastering, GOODBYE IVAN (Brussels) plays guitar with a bow and some electronic fx when he's not messing around with his touch sensitive sampler, POL (Geneva) is in charge of the SH-101, strange sequences of sounds and more electronics.

ENOIA paints a beautiful and very atmospheric uplifting soundscape that provokes instant-trance in the audience. The contrast between the ethereal violin-like slow chords progressions of GOODBYE IVAN floating on top of the earthly grounded intricate and unpredictable patterns of DA SAZ is subtly enhanced by the melodic outer-space sounding sequences designed by POL.

Their first album has been produced in a swiss chalet in the Alpes in 2016.
Their second album has been produced in a farm in the Pyrénées in 2018.
Their third album has been produced in an old house in the Salève in 2020.
Their fourth album will be produced in Willem Twee studio in Netherland in 2023.
